- C. Cisco TelePresence Control
- D. another Cisco TelePresence Expressway

Answer: A

QUESTION: 40

When must you use the software version of the Cisco TelePresence Management Suite as apposed to the hardware box?

- A. when managing infrasture as well as endpoints
- B. when the total number of calls exceeds 500
- C. when the total number of systems exceeds 100
- D. in a multivendor environment

Answer: C

Explanation:

The hardware appliance is limited to a maximum of 100 managed devices. Both the hardware solution and software running on a more powerful server have the same features as far as working in a multi-vendor environment. Cisco TelePresence Management Server Product specifications Base software product is initially configurable for up to 25 or 100 managed devices • Base capacity may be extended through additional purchased licenses >>>>• Additional system licenses (up to 100 managed devices or 5,000 large scale provisioning users and devices)

- Additional Cisco TelePresence Movi licenses (up to 5,000 users)
- Base product functionality may be extended through feature licenses or accessory products
- Cisco TelePresence Management Suite Extension for Microsoft Exchange
- Cisco TelePresence Management Suite Extension for IBM Lotus Notes
- Cisco TelePresence Management Suite Extension Booking API
- Cisco TelePresence Management Suite Analytics Extension
- Cisco TelePresence Management Suite Network Integration Extension
- Cisco TelePresence Management Suite Application Integration Extension

QUESTION: 41

- A. 42, 52 and 65 inches
- B. 42, 45 and 55 inches
- C. 37, 42 and 52 inches
- D. 37, 45 and 60 inches

Answer: A

QUESTION: 42

Which is a type of deployment for the Cisco TelePresence Management Suite?

- A. enterprise provisioning
- B. large-scale provisioning
- C. small-scale provisioning
- D. intermediate provisioning

Answer: B

Explanation:

Large scale Provisioning

- Very large scale user centric deployment model that powers authentication and key services that offers a deployment alternative for mass deployed, low touch devices (up to 10,000 devices)
- Distributed, redundant architecture leveraging Cisco TelePresence Video Communication Server (VCS) clustering technology
- Synchronizes with the Enterprise Directory for automatic user account creation and upkeep
- Authentication service to authorize and identify subscribed users
- Configuration settings and policies for automatic configuration of registered users/devices
- Directory service for providing phonebooks to registered users/devices that can be integrated with other

Cisco TMS phone books

- Supports automatic creation of user dial plan aliases and FindMe profiles
- Supports Cisco TelePresence Movi, Cisco IP Video Phone E20, Cisco TelePresence System EX90 and Cisco TelePresence System EX90 devices

QUESTION: 43
